

Marcrista Luxury Yacht

Marcrista, 52 feet, is one of the most luxuriously appointed, sophisticated and functional yachts, operating in Australian waters. She was designed by world renowned naval architects and custom built to Australia's highest safety standards. A yacht of her calibre is normally in the hands of private owners and not available for chartering. In Marcrista's case however, her owner operators, enthusiastically offer her for exclusive charter and love sharing the Great Barrier Reef experience and the opportunity to visit some of the most secluded areas of this pristine paradise. We offer private day charter to Low Isles and the Outer Reef and extended charter to more fully experience the rare beauty of this area, visiting sparkling sand cays, deserted islands and the absolute jewel of the reef, the stunningly beautiful Lizard Island.
